

HIGHLIGHTS

Alumni Association, College of Family & Consumer Sciences,
The University of Georgia

Winter/Spring, 1992

Welcome, Dean Nickols

The Alumni Association and the College of Family and Consumer Sciences are pleased to welcome Dr. Sharon Y. Nickols as the fifth Dean of the College. Following an extensive national search, Dr. Nickols was named Dean of the College in August, 1991. Prior to coming to The University of Georgia, Nickols served as director of the School of Human Resources and Family Studies at the

University of Illinois. Previously she was on the faculty at Oklahoma State University and served as director of the Family Study Center.

Dr. Nickols received her B.S. degree from Kansas State University, her M.A. degree from Teachers College at Columbia University and her Ph.D. from the University of Missouri. She is an active member of many professional organizations and is currently serving as president of the Association of Administrators of Home Economics.

She has made outstanding contributions to the profession both at the national and international level. She was a Fulbright Lecturer to the University of Malawi, was selected to present the American Home Economics Association Commemorative Lecture in 1988 and was recognized as an AHEA Leader in 1989. Dr. Nickols is married to

1992 Annual Meeting

Join us in Athens, Wednesday, May 13, 1992 for the Annual Meeting of the Home Economics/Family and Consumer Sciences Alumni Association. Complete information is included in this issue of Highlights.

Samuel A. Nickols, an ordained minister of the Christian Church (Disciples of Christ). They have four children and three grandchildren.

The first six months with Dean Nickols have been exciting for the College. She has been described by those who work with her as perceptive, creative, responsive, caring and personable. She daily exhibits leadership skills which are indicative of her professional commitment to excellence in teaching, research, and service programs. Dr. Nickols believes that alumni are important partners in fulfilling the goals of the College. We look with pride to our future under the leadership of Sharon Y. Nickols.

From the Dean's Desk...

"The Human Element" — Needed Now More than Ever

After several months at The University of Georgia as Dean of the College of Family and Consumer Sciences, I feel an even greater sense of enthusiasm than I did when I accepted the position. Why is it possible to be enthusiastic about higher education, in general, and the College of Family and Consumer Sciences, specifically, when the warm words of welcome have been interspersed with several pieces of bad news? In particular, the bad news focused on a major cut in state funds to the University. The key to my enthusiasm lies in what I will call "the human element."

Consumer Sciences
Home Economics/Family and
Consumer Sciences Alumni
Association
The University of Georgia
Athens, GA 30602*

In my first 200 days as Dean of the College of Family and Consumer Sciences, I have found the following:

- ◆ highly capable faculty who are dedicated teachers, researchers, and providers of public service,
- ◆ bright undergraduate students eager to learn and to develop leadership skills for the future,
- ◆ very talented graduate students from diverse backgrounds who were attracted to the high quality of the academic programs and the relevancy of the research in the College,
- ◆ competent and loyal support staff who take pride in their work and a sincere interest in the students and faculty they serve,
- ◆ a firm foundation of careful development of programs in the College attributable to Dean Emerita Emily Pou, and last, but by no means least,
- ◆ loyal, dedicated alumni who care deeply about the stature and relevance of their College.

Together, these characteristics of the College of Family and Consumer Sciences comprise “the human element” that enables us to cope with the current fiscal constraints and to maintain our vision of excellence for the instructional, research, and public service programs.

Another aspect of “the human element” is that it is the focus of programs in the College of Family and Consumer Sciences. As Alvin Toffler observed a few years ago in his book *The Third Wave*, the increasing emphasis on “high tech” in the modern world needs to be balanced with “high touch,” i.e., understanding and support of human development and interpersonal relationships, in their broadest sense. An extraordinary number of the current problems facing our society involve a human element; for example, personal and environmental health risks threatening to

our citizenry; economic insecurity of our households; crises of parenthood, adolescence, adulthood, and aging; and the rapidity of change in family patterns. In the College of Family and Consumer Sciences, the most sophisticated scientific technologies are being applied to the study of nutrition, textile properties, interpersonal relationships in families, and components of the near environment. One of the unique aspects of home economics/human ecology/family and consumer sciences is that there is harmony between these “high tech” approaches and the “high touch” philosophy. The application of technology has a purpose—improving the quality of life for individuals and families.

The following statement about the capacity of home economics/family and consumer sciences was developed at a national invitational conference held at Callaway Gardens, Georgia, in October 1991: “We believe that the profession has the capacity

- ◆ to enhance the human condition,
- ◆ to improve individual and family well-being,
- ◆ to impact the quality of goods and services in meeting human needs, and
- ◆ to provide information for the development of public policy.”

In our rapidly changing, complex world, the knowledge base and the professional expertise of graduates of our College are needed now more than ever. It is essential that we maintain a strong, vital, leading-edge College of Family and Consumer Sciences at The University of Georgia to meet the demands for professional expertise and research findings to be disseminated to benefit the public.

Your support of higher education, in general, is very important. I urge those of you who live in Georgia to talk with

College of Family and Consumer Sciences

your delegates in the Legislature about the importance of higher education, and to support their efforts to restore an adequate level of funding to our educational institutions. Increasingly, private gifts make a critical difference in the ability of the College to maintain unique programs. There are many new initiatives that would greatly enhance the College, and we will be sharing these with you in future newsletters as I work with the Alumni Association Board of Directors to set priorities among these initiatives. Thanks to past generous support from alumni and friends, there is a firm foundation upon which to build.

Finally I want to say that it was indeed a pleasure to meet over 250 alumni of the College at the nine receptions held throughout the state from the end of September to mid-November. Thank you for the wonderful hospitality at the "Meet the Dean" events. I look forward to working with you as we enhance "the human element" of our outstanding College of Family and Consumer Sciences.

Sincerely,

Sharon Y. Nickols
Dean

Thank you, Dean Pou, for 20 Outstanding Years

Dean Emily Quinn Pou retired from the College of Family and Consumer Sciences in August, 1991. We thank you, Dean Pou, for the contributions you made through 20 years of outstanding leadership to our College. The following provides a brief overview of selected achievements from 1971-1991:

- ◆ **Developed a strong faculty:** The number of faculty with earned doctoral degrees increased from less than 50% in 1971 to more than 80% in 1991.
- ◆ **Developed highly specialized programs:** The number of required core courses was reduced from 50 hours to 20 hours, thus allowing students to have more advanced courses within a given major and to become more competitive in the labor market.
- ◆ **Fostered the growth of research funding:** In the early 1970's, virtually no extramural funds were being obtained; nearly two million dollars were obtained in 1989-90.
- ◆ **Guided the development of graduate programs:** Three departments in the college now have a doctoral program and the fourth department has submitted a preliminary proposal to the Board of Regents for review.
- ◆ **Developed the Legislative/Congressional Aide Program:** In 1983 Dean Pou initiated this program

which provided outstanding students the opportunity to serve as aides to legislators in the Georgia Legislature and in the U.S. House of Representatives.

- ◆ **Tripled the number of scholarships:** In 1971, few scholarships were available; today there are 17 scholarship funds with approximately 54 scholarships awarded annually.
- ◆ **Developed and fostered the growth of the Public Service Unit which is housed in the Georgia Center for Continuing Education:** More than 5,000 clients each year have access to current information on the subject matter encompassed in the diverse disciplines of the College.
- ◆ **Obtained College status:** The school officially became a College in 1978, and in 1990 the name of the unit was changed to College of Family and Consumer Sciences.

Dean Pou is respected by all who know her. She helped establish a proud tradition of excellence for our College — one that we will strive to maintain. Dean Pou, we appreciate the wisdom and strength you shared with us, for continually encouraging faculty and students to reach their highest potential. We thank you for providing a solid foundation for the decades ahead!

The 1991 Creswell Award was presented to Dean Emily Quinn Pou for 20 years of outstanding leadership to the College of Family and Consumer Sciences by Jean Bauerband, Awards Committee Chair.

From the President's Pen...

You Would Have Been Proud If You Had Been There

Since I took a *position of importance* in the University of Georgia's Alumni Association of the College of Family and Consumer Sciences, I am continually amazed at the "state of our college!"

Recently, I had an opportunity to speak at "Parent's Day." (I wanted them to know that we need them immediately upon graduation so they can influence other people to pursue a degree in our College.) During the day, the parents, students, and others toured Dawson Hall. Do you remember when we were there? I always thought Dawson Hall was dismal and lackluster. Not so any more! Our College is really beautiful, warm and friendly. There are no more cooking and sewing labs! Instead, the labs are state-of-the-art. The computer lab represents the latest in anything you can imagine doing on the computer. My daughter and I had a neat time in the textiles lab. What a way to learn about fibers. Of course the institutional foods lab is just wonderful. All that impressive stainless steel.

The students in our college are involved in a new and different learning process. They are learning what they need to know to compete in the real world today. I was so impressed.

Of course, the day would not be complete without chatting with our new Dean. Dean Sharon Nickols is a delight. She is energetic, enthusiastic and directed toward continuing the tradition of making our College the very best. Many of you have had an opportunity to meet her. If not, I hope you have that opportunity soon. Dean Nickols leads in such a way that it is easy to follow. She is open to your ideas and suggestions.

Our Alumni Association has been well represented this year in all of the outstanding activities of the College. In October several alumni honored the memory of Montine Jackson in a ceremony outlining her outstanding career as a dedicated home economist, recognizing her family and presenting a portrait to be placed in the Honor Hall of Recognition in Dawson Hall.

Our association honors others who have contributed to our College. We have the Pacesetter Award that honors an alumnus who within the last ten years has received a degree from our College and who actively promotes the beliefs and values of home economics. A Distinguished Alumni Award is presented to someone who received a degree from our College who has made significant contri-

butions that sustain the beliefs and values of our College. The Creswell Award honors a faculty member currently serving or retired from our College; the Home Economics Appreciation Award honors an individual who has provided significant contributions to our College.

The last four awards listed will be presented at the Awards Luncheon on May 13 in Athens. I hope you will make a special effort to attend the luncheon. You will have an opportunity to visit with students from our college and see and hear as scholarships are being awarded to them. Following the luncheon we will have an opportunity to hear first hand about our Legislative Aide program from a student and from those who have benefitted from the program. What a special time to renew old friendships and do some networking with students. I think you will find that the state of our College is excellent.

I have enjoyed the challenge of being your president and the honor of an association with the best College on campus, The College of Family and Consumer Sciences. Thank you for your continuing support of *our College*.

Gloria C. Berry, President
Home Economics/College of Family and Consumer
Sciences Alumni Association

Highlights on Our Alumni

Rosemary Dunn Stancil (BSHE '68), Secretary of the Alumni Association, co-authored *The Microwave Cook's Complete Companion* with Lorela Wilkins. Rosemary was one of three authors for the cookbook *Simply Scrumptious Microwaving*, published in 1982.

Christina Weatherford Brannen (BSHE '77), former president of the Alumni Association, is customer information system project manager for the Northeast Georgia Division of the Atlanta Gas Light Company.

Martha Crissey Anderson (BSHE '84), a home economics journalism graduate, is account executive of the Atlanta office of Fleishman-Hillard, Inc., the largest independent public relations firm in the United States.

Deborah Garrison Lowery (BSHE '79, MAJ '81) was one of five finalists in the 1992 National Magazine Awards for "Our Deadly Harvest," a two-part series on farm safety she coordinated and co-wrote for *Progressive Farmer* magazine. The National Magazine Awards are the magazine industry's equivalent of the Pulitzer Prize. The series competed with articles appearing in *The New Yorker*, *U.S. News and World Report*, *Family Circle*, and *American Health*. Lowery is Senior Editor at *Progressive Farmer* magazine based in Birmingham, Alabama.

Georgia Longitudinal Study

One of several research projects in the Department of Child and Family Development is a longitudinal study examining the family factors related to behavior problems in children. The project, Georgia Longitudinal Study (GLS), is co-directed by Dr. Charles Halverson, Principal Investigator, in collaboration with Dr. Karen Wampler, a former UGA faculty member now at Texas Tech University. The project is funded by the National Institute on Mental Health.

Halverson's work in child behavior and Wampler's professional emphasis in marriage and family therapy have proved

Left to right: Karen Shetterley, Mike Williamson, Sabrina Royer, Catherine Cooper, Carol Watson and Dr. Chuck Halverson.

to be a valuable combination in undertaking this study. Contributing substantially to our knowledge about how children and parents influence each other, the premise for the study is that family members do not operate independently. Rather, families operate as a system: each member's behavior influences all the others in the family. Thus, the study involves careful assessments of the home environment, the marriage, personality traits, parenting styles, and behavior of the children.

The GLS is one of the first comprehensive studies of preschool and school-age children and their families in the world. Data have been collected from families visiting the McPhaul Center where family interaction was videotaped; researchers have also visited families in their homes. Data were collected from children, their siblings, and parents. In addition, data on school behavior and academic performance have also been collected from the children's teachers.

Findings from the GLS appear to confirm the basic premises held by the researchers:

- ◆ Boys' difficult, aggressive behaviors have a direct influence on the degree of marital distress experienced by parents. For girls, this has not been found.
- ◆ The more resources (including education, communication skills, ability to cope with stress, friends, family cohesion) a couple has, the better are their chances of overcoming child-rearing problems and they have children who improve over time.
- ◆ Parents who have more parenting skills are also more often in agreement about childrearing and are more consistent in the way they parent their children.
- ◆ Harmonious sibling relationships are closely tied to amounts of aggression in older brothers (negatively) and prosocial behavior of both siblings over time.

Undergraduate and graduate students who have worked on this project include Karen Shetterley, Carol Watson, Mayssel White, Julie Serovich, Mike Williamson, Brenda Boyd, Nancy Hollett-Wright, Cathy Stawarski, Jim Deal, John Moore, Sabrina Royer, Angela Pesce, Dominique Gore, Mike Moreau, Sandra Cantrell, Kim Rudolph, Lisa Whitehead, Lisa Pope, Gina diBenedetto, Summer McNair, and Denise Booth.

Parents Welcomed to Campus

The Student-Faculty Affairs Committee of the College of Family and Consumer Sciences sponsored its second annual Parents' Day on Saturday, February 22, 1992. Approximately 150 parents and students were present to "experience Dawson Hall for the day." They were welcomed to the College by University President Charles Knapp, Andrew Whitaker, Committee Chair, and Dean Sharon Nickols. Each of the four department heads plus the advisors for Home Economics Journalism and Education provided a brief overview of the teaching responsibilities, research activities and outstanding accomplishments of their departments. Gloria Berry, President of the Alumni Association, represented the Association in officially welcoming parents.

The highlight of the day was providing the opportunity to meet and visit with faculty members from each of the departments and to allow parents to visit laboratories where exciting research is conducted each day. The computer lab with the latest in technology was a popular stop for many!

1991-92 Officers

President — *Gloria Berry*, Walton Electric Membership Corporation, P. O. Box 260, Monroe, GA 30655

President-Elect — *Tish Corbett Searcy*, Gainesville College, P. O. Box 1358, Gainesville, GA 30503

Secretary — *Rosemary Dunn Stancil*, *Kitchen Classics*, 1220 Mason Mill Road, Athens, GA 30606

Treasurer — *Marihope Troutman*, Atlanta City Schools, 711 Catherine Street, Atlanta, GA 30310

Contributions

Are you an active participant in the Alumni Association? Maintain your active status through your contribution to the College of Family and Consumer Sciences. All or a portion of any contribution made to The University of Georgia Annual Fund may be designated for our college and alumni association. A minimum gift of \$25.00 will entitle you to receive the *Georgia Alumni Record*.

If you are employed in business or industry, your company may match your gift. Check with your personnel office or the Home Economics Alumni Office to determine the procedure for the matching gift program.

Return form and check to Office of Alumni Affairs, Suite 288, Georgia Center for Continuing Education, The University of Georgia, Athens, GA 30602. For the following funds,

make checks payable to The University of Georgia Foundation and indicate which fund you are contributing to:

- ◆ **Family and Consumer Sciences** — supports Alumni Association activities and other activities of the College which are not supported with state funds.
- ◆ **Family and Consumer Sciences Mary Creswell Research Fund** — supports research activities of graduate students.

For the following fund, make check payable to The University of Georgia and indicate the name of the fund on the check.

- ◆ **Family and Consumer Sciences Emergency Loan Fund** — supports short term loan funds for students.

College Offers Diversity in Majors

We need your assistance! When you counsel young people about college choices or career options, tell them about the programs offered in the College of Family and Consumer Sciences. The fourteen majors in the college provide students at the undergraduate level many options. These include: Child and Family Development, Child Development-Early Childhood Education, Nutrition Science, Consumer Foods, Dietetics and Institution Management, Hotel and Restaurant Administration, Consumer Economics, Housing, Textile Science, Textile and Apparel Management, Fashion Merchandising, Furnishings and Interiors, Home Economics Education and Home Economics and Journalism.

What's the UAP All About, Anyway?

The University Affiliated Program for Persons with Developmental Disabilities (UAP) of The University of Georgia, a federally funded program of training, research, public service and dissemination dealing with health and human services issues, specifically those concerning developmental disabilities, became part of the College of Family and Consumer Sciences in 1989. UAP's are located at major universities and teaching hospitals in more than 40 states.

One of the longest continuously funded federal programs on the Athens campus, the Georgia UAP seeks excellence in its programs of preservice training, technical assistance, research, service, dissemination and program evaluation with the belief that systematic interrelationships of these components foster excellence of the whole. Among guiding principles of the Georgia UAP are the beliefs that all stages of the life cycle are equally important, that families are critically important, that community integration should be emphasized, and that coordination is necessary for effective service delivery. The Georgia UAP strives to improve quality of life, integration into the community, independence, and productivity of persons who have developmental disabilities through all aspects of its multi-fold mission.

Under the direction of Dr. Zolinda Stoneman, the staff of the Georgia UAP provides administrative coordination of core functions of Administration, Interdisciplinary Training, Technical Assistance, Research, and Dissemination. Program specialists on the staff coordinate specific sub-area functions.

The Georgia UAP focuses on innovative practices which improve delivery of services to persons who have develop-

mental disabilities across the lifespan, and to their families. Service, practicum and internship sites are community based, including on-campus clinics in Pediatric Exercise and Motor Development, Adult Special Education, Speech and Hearing, and Pediatric Neurology at the Medical College of Georgia in Augusta. In addition, Atlanta's REACH, Inc., Challenge Child, Inc. in Gainesville, GA, recreation and leisure programs across the state, senior citizen centers in Northeast Georgia, Project CEEI on the Athens campus and sites in a number of other cities and towns enhance the learning experiences of UAP trainees. Currently, the UAP has underway an initiative on aging and developmental disabilities, a grant to develop leaders in early intervention, and a program to offer mentoring to minority students.

Meet the Faculty

Research and Instruction

(Public Service Faculty to be featured in next edition of Highlights.)

Acting Associate Dean: Dr. James Walters, Professor Emeritus and former head of the Department of Child and Family Development, was recognized in 1991 as an AHEA Leader. Walters served as president of the National Council on Family Relations and was editor of *Family Relations*. A recipient of the Josiah Meigs Award for Excellence in Teaching at UGA, he also is the recipient of the Osborne Award, a national award given annually to the outstanding teacher of the year in Family Relations. The first male in the United States to serve as a family specialist in the Cooperative Extension Service, and a former newspaper columnist whose columns appeared in *The New York Sun*, Walters is co-author of *Relationships in Marriage and the Family*.

DEPARTMENT OF CHILD AND FAMILY DEVELOPMENT

Department Head: Dr. Sharon J. Price, Professor, is a nationally recognized researcher and author in the field of divorce and remarriage. She is a former president of the National Council on Family Relations; a recipient of the Osborne Award, an award given annually to the outstanding teacher of the year in Family Relations; and a recipient of the Josiah Meigs Award for Excellence in Teaching at UGA. Dr. Price has served on numerous national professional and editorial boards. In 1984-85 Price served as an American Council on Education Fellow in Academic Administration at the University of Wisconsin and is a former member of the Governor's Task Force on Child Support. Dr. Price teaches in the areas of interpersonal relationships and marriage, family theory, and supervises doctoral students preparing to be marriage and family therapists.

Dr. Patricia Bell-Scott, Professor, is co-founder of the journal, *SAGE: A Scholarly Journal on Black Women*, which is devoted to the writings of and about African-American women, and she is the senior editor of *Double-Stitch: Black Women Write About Mothers and Daughters*. In addition, she has served as a guest co-editor for a special issue on black adolescents for the *Journal of Adolescent Research*, and as a guest co-editor for a special issue on black women for *Psychology of Women Quarterly*. Dr. Bell-Scott teaches in the areas of adolescence, family development, and women in families and society.

Dr. Gene Brody, Research Professor, is a nationally known researcher and a co-director of a major research study, "Child Competence, Parenting and Family Transactions in

Rural Black Families." His work includes studies of the origins of harmonious and conflicted sibling relationships, as well as the ways in which marital problems compromise parent-child relationships and child development. Dr. Brody is the recipient of UGA's Research Foundation Creative Research Medal and is a Fellow in the UGA Institute for Behavioral Research. Dr. Brody has served as an editorial board member or as an editorial consultant for 19 national journals. A popular teacher, Brody teaches the 250-student introductory course in the department, CFD 210, and is one of the teachers of the advanced level seminar, Proseminar in Individual and Family Systems.

Dr. Thomas "Mick" Coleman, Associate Professor, is a member of the Child Care Planning Committee for the Georgia Department of Human Resources, the U.S. Department of Agriculture Advisory Committee on School-Age Child Care; and the Advisory Committee for the project, "Home Safe," American Home Economics Association. His areas of emphasis include preschool child care and education, family relations, parenting and school-age child care. Dr. Coleman coordinates the Internship Program in the department and teaches Family Development, Parent and Child Guidance, Marriage and Family Problems, and Practicum in Child and Family Development.

Dr. Richard C. Endsley, Professor and Graduate Coordinator of the Graduate Program in the Department of Child and Family Development, is a nationally recognized researcher in the area of child care, children's curiosity development, and career development. He is a co-author of a book, *Quality Day Care: Choices for Parents and Caregivers*. Dr. Endsley has addressed the process by which parents select day care as well as the variety of dissatisfactions parents experience with different child care arrangements. He teaches courses in Current Research and Issues in Child and Family Development; Child Care, Work, and the Family; and Development of the Young Child.

Dr. Jerry Gale, Assistant Professor, is a marriage and family therapist who is the Director of Clinical Services at the McPhaul Marriage and Family Therapy Clinic. His research includes the study of the therapeutic process and the ways of improving parent-child interactions. He is currently focusing on investigating the differences between solution focused therapy and problem-focused therapy. Before coming to The University of Georgia, Dr. Gale served as a family therapist in several therapy programs. He is a clinical member of the American Association for Marriage and Family Therapy, teaches in the area of Marriage and Family Therapy, and supervises the clinical practice of students in this area.

Dr. Charles F. Halverson, Professor, is an internationally known developmentalist who is the co-director of one of the nation's largest longitudinal studies of children and their families and a co-director of a comparative study of patterns of childrearing in the United States and West Germany. He has served as chair of the National Institute of

Mental Health Review Committee: Life Course and Prevention and has served as an editorial consultant to numerous journals. Before coming to UGA, Dr. Halverson served as Chair of the Section on Child Behavior, Laboratory of Developmental Psychology, and Child Research Branch, National Institute of Mental Health Intramural Research Program. His research is funded by the National Institute of Mental Health. He teaches Introduction to Child Development, Theories of Human Development, and participates in the Proseminar in Individual and Family Systems.

Ms. Diane Kohl, Assistant Professor, specializes in Child Development and Early Childhood Education and assumes major responsibility in the department in advising students and providing leadership in the undergraduate programs. Ms. Kohl has served as a consultant to numerous schools and professional organizations and has served as Georgia's representative to the Southern Association on Children Under Six. In 1987 and in 1990, she received the Outstanding Teacher Award in the College. Ms. Kohl teaches Parent and Child Guidance, Group Programs for Young Children, and Child Care Centers Management.

Dr. Ligaya P. Paguio, Associate Professor, specializes in Child Development and in Early Childhood Education. Her research interests include childrearing practices in the Philippines, Brazil and the United States; food preferences of young children; and creativity in young children. A frequent workshop participant, Dr. Paguio teaches Introduction to Child Development, Parent and Child Guidance, and Prenatal and Infant Development.

Dr. William Quinn, Associate Professor, is the Director of the Marriage and Family Therapy Clinic at the McPhaul Child and Family Development Center. Dr. Quinn's research includes focusing on clinical interventions and outcomes with adolescent substance abusers and their families and analyzing clients' experiences of marriage and family therapy. He is a Fellow of the American Association for Marriage and Family Therapy and a clinical member and approved supervisor of AAMFT. In 1980 he was the recipient of the Outstanding Graduate Student of the Year in Family Relations presented by the National Council on Family Relations. Dr. Quinn teaches Principles of Family Counseling, Family Systems Theory, and Practicum in Marriage and Family Therapy.

Dr. Patsy Skeen, Professor, is a developmentalist whose text in child development has been adopted in over 150 colleges and universities. She is a prolific writer who has served in an editorial capacity for several professional journals, including *Childhood Education* and *Dimensions*. Her research concerns understanding the nature of parent-child relationships, and she has conducted research in Brazil, the Philippines, the Soviet Union and Poland. Dr. Skeen teaches Introduction to Child Development. In 1977 and in 1984 she received the Outstanding Teacher Award in the College.

Dr. Zolinda Stoneman, Professor, is the director of the Georgia University Affiliated Program for Persons with Developmental Disabilities. A nationally known scholar, she is the recipient of UGA's Research Foundation Creative Research Medal and a co-director of a major research study, "Child Competence, Parenting and Family Transactions in Rural Black Families." She has served as a consulting editor for the *American Journal of Mental Deficiency*. She publishes extensively in many journals in her field including *Child Development*, *Developmental Psychology*, and *The American Journal of Mental Deficiency*.

Dr. Charlotte Wallinga, Associate Professor, serves as the director of the Child Life Program in the department. Dr. Wallinga initiated the Head Start Program at the McPhaul Child and Family Development Center and has secured funding for these programs. A former director of the McPhaul Children's Programs, Dr. Wallinga's administration led to many innovations during her tenure, including the mainstreaming of children with developmental disabilities into the children's programs. Her research includes family member's responses to pediatric illness and hospitalization. Named an Outstanding Young Alumni at Iowa State University, Dr. Wallinga also received the Outstanding Teacher of the Year Award in the College in 1983 and 1988. She teaches Introduction to Child Development, Hospitalized Child and the Family, and Practicum in Child and Family Development.

Dr. Lynda Henley Walters, Professor, teaches in the areas of adolescent development and research methodology. Dr. Walters served for 12 years as the Associate Dean of the College and played a major role in the development of the Computer Laboratory in the College; the laboratory is considered one of the best on the UGA campus. Her active interest in international studies led to her being selected by the Academy of Sciences in Russia to participate in a cross-cultural study of family life involving two republics in the former Soviet Union, the Russian and Georgian Republics; Poland; and the United States. A former president of the National Council on Family Relations, Dr. Walters also served as the chair of NCFR's Research and Theory Section. Her research interests are primarily concerned with adolescents, and the impact of the law on families. She received the Outstanding Teacher Award in the college in 1986 and 1989.

DEPARTMENT OF FOODS AND NUTRITION

Department Head: Dr. Roy J. Martin, Alumni Foundation Distinguished Professor, is one of the leading researchers in the world in the area of obesity. His work on obesity focuses on the central nervous system's regulation of energy balance, food intake, and body composition. Dr. Martin is a recipient of UGA's Creative Research Medal for his research and has received numerous other national awards. He has had over 170 articles published and has served on

the editorial boards of the *Journal of Nutrition* and the *Journal of Animal Science*. He has had over 25 research grants and projects funded, serves as the Graduate Coordinator in the department, and teaches a graduate seminar on foods and nutrition.

Dr. Carolyn Berdanier, Professor, has developed an animal model for the study of maturity onset hyperlipemia and glycemia, two conditions related to the development of heart disease, one of the leading causes of death in this country. As the result of her many research publications, in 1984, Dr. Berdanier was the recipient of the Lamar Dodd Award, the highest award given at UGA for creative research in science. Dr. Berdanier supervises the research of nutrition science honors students and teaches Advanced Nutrition and Metabolic Controls in Nutrition. Author of over 125 publications in such journals as *Journal of Nutrition*, the *American Journal of Clinical Nutrition*, and *Nutrition Research*, she has served as an expert witness for the United States Senate Committee on Nutrition and Human Needs.

Dr. Nancy Canolty, Associate Professor, is a specialist in nutrition whose major interests are in protein/energy utilization and in the nutritional consequences of lithium therapy. Dr. Canolty has developed a rat bioassay to screen new or reformulated infant formulas preclinically. Her findings could have important consequences in view of the long-term health effects of not only body weight but of body composition as well. Dr. Canolty teaches Human Nutrition and Food, the largest class in the department, as well as Advanced Nutrition and Metabolic Controls in Nutrition.

Dr. Anne Dattilo, Temporary Assistant Professor, came to the faculty from the Cooperative Extension Service where she worked as an education program specialist in the Expanded Food and Nutrition Education Program. Her research focuses on the area of weight control and cholesterol reduction, including the effects of caloric-restricted versus fat-restricted diets on weight reduction and blood lipids, and the effects of polyunsaturated versus monounsaturated fatty acids on blood lipids. She has published in the *Journal of the American Dietetics Association* and *Research Methods for Nutrition and Dietetics*.

Dr. James Hargrove, Associate Professor, studies the effects of diet and diabetes on kidneys and other organs. Because high levels of protein appear to impair kidney function, especially if the kidney is already diseased, Dr. Hargrove is interested in ways that the body conserves its supply of protein and in effects produced by dietary protein at the genetic level. Dr. Hargrove recently received the Cosmos Achievement Award from the National Aeronautics and Space Administration for participating in joint US-USSR space research. In the last two decades, Dr. Hargrove has published 40 articles and has received numerous grants, the latest of which was a grant for \$290,000

from the National Institute of Diabetes, Digestive, and Kidney Disease. He teaches Advanced Nutrition in the department.

Dr. Mary Ann Johnson, Associate Professor, is a researcher whose work on copper nutrition has improved our understanding of how common nutritional supplements such as vitamin C, iron, and zinc markedly interfere with this essential trace element and contribute to severe anemia and heart disease. As an investigator in the Georgia Centenarian Study, Dr. Johnson seeks to identify nutrition and health behaviors that may contribute to longevity. She has served as the State Annual Meeting coordinator, chairperson of the Research Committee, and chairperson of the Georgia Nutrition Council. She is a reviewer for several journals including the *Journal of Nutrition*, *American Journal of Clinical Nutrition*, *Journal of Food Quality*, and *The Journal of Nutritional Biochemistry*.

Ms. Charlotte McNeil, Assistant Professor, teaches in the area of Food Service. Her service to the college extends over two decades. A recipient of the Ag Hill Outstanding Teacher of the Year Award in 1981, Ms. McNeil is active in numerous professional and honor societies. She has served as the Student Dietetic Club advisor and the chapter advisor for Phi Upsilon Omicron. She has frequently taught in the public service training programs for the Department of Corrections.

Dr. Richard D. Lewis, Assistant Professor, is a researcher in the area of weight control of adults and children. His program for children is focused on sensible eating (without low-calorie, restrictive diets), improving family relationships surrounding eating, modifying behavior patterns, and increasing physical activity and improving self-esteem. Dr. Lewis was an extension nutrition and health specialist before moving to the department in 1991. A former president of the Georgia Nutrition Council, Dr. Lewis was a guest editor in 1991 of an issue of *Nutrition* on "Obesity: Determinants and New Therapeutic Approaches." Dr. Lewis teaches Life Cycle Nutrition, Nutrition in Disease, and Readings in Nutrition.

Dr. Julia Poynter, Assistant Professor, has primary responsibilities for the program in Hotel and Restaurant Administration and teaches Hospitality Sales and Service, Seminar in Hotel and Restaurant Administration, and Hospitality Cost Control and Systems. Other responsibilities involve computer instruction in industry-related software. Dr. Poynter has received two grants to develop nutrition education modules for statewide use. She is a member of the Council on Hotel, Restaurant and Institutional Education; the National Restaurant Association; the Foodservice Systems Management Education Council; and the American Dietetics Association. Her research focuses on successful characteristics of bed and breakfast inns. Dr. Poynter supervises the internships of students in Hotel and Restaurant Administration.

Dr. Marion Wang, Associate Professor, is the director of the dietetics program in the department, a program that is nationally recognized for its excellence. Dr. Wang's research program focuses on the role of dietary factors in brain and kidney functions. She is particularly interested in how protein and amino acids influence organ function. Dr. Wang teaches Nutrition in Disease, Advanced Nutrition, and Foods and Nutrition Practicum. Prior to coming to The University of Georgia, Dr. Wang was a research biochemist in the Department of Medicine, University of California in Los Angeles.

DEPARTMENT OF HOUSING AND CONSUMER ECONOMICS

Acting Department Head: Dr. Carol Meeks, Professor, is primarily interested in consumer economics, especially household time use and the impact of technology on consumers, and economic aspects of housing, particularly housing finance. Her work has been used by the U.S. Congress, and she has served on the HUD Manufactured Housing Council. Dr. Meeks has provided editorial services for several journals and she has served on the board of directors and as chair of the Research Initiatives Committee of the American Council on Consumer Interests. She serves as chair of the National Association of Home Builders Research Center Consortium. She has also served on the boards of directors of the National Institute of Building Science and of the Society of Government Economists. A prolific writer and researcher, Dr. Meeks' professional activities have involved assignments in Africa and Norway. She teaches Introduction to Housing, Consumer Legislation, and Policies and Programs for Consumers.

Dr. Douglas C. Bachtel, Associate Professor, is a recent addition to the department. Prior to his appointment in the college, he was an extension rural sociologist in the UGA Community Development Department, Cooperative Extension Service for 11 years. Dr. Bachtel's publication activities cover a broad area, including serving as editor of the *Journal of Community Development Society* and *Southern Journal of Rural Sociology*. His numerous publications about Georgia include the popular *Georgia County Guide* series, which he has published each year for over a decade. Dr. Bachtel teaches Family, Social and Economic Systems and State and Local Housing Developments.

Dr. Deborah Godwin, Associate Professor, is a family economist who has several research interests including investigations of farm wives' employment and economic status, and cash flow management of newlywed couples in Georgia. Dr. Godwin was the co-recipient of the Reubin Hill Award in 1990, given annually by the National Council on Family Relations for the most outstanding family research published during the previous year. Her award-winning paper was "Couple Consensus During Marital Joint Deci-

sion-Making: A Context, Process, Outcome Model." Dr. Godwin serves on the editorial board of the *Journal of Marriage and the Family* and is reviewer for several other professional journals. She teaches Family Economics Environment, Special Problems in Housing and Consumer Economics, Research Methods, and supervises internships in Housing and Consumer Economics.

Dr. Joan Koonce, Assistant Professor, is a consumer economist whose research interests include consumer behavior and financial management behavior of low-income and elderly families and the use of consumer information, complaint handling, and mail-order use of the elderly. Dr. Koonce has provided editorial services for several journals, including *Financial Counseling and Planning Education Journal*. Several of her recent publications have appeared in *Advancing the Consumer Interest*, the *Journal of Extension*, and *The Review of Black Political Economy*. She served with the Georgia Extension Service from 1988 to 1990. Dr. Koonce teaches Principles of Family Finance, Family Consumer Systems, and Advanced Family Finance.

Dr. Estoria Maddux, Associate Professor/Extension Family Financial Management Specialist is the only tenured Extension faculty member in the College of Family and Consumer Science. Author of the *Financial Record Book* that is used by thousands of families in Georgia and many popular publications on a variety of family financial topics such as *Are Your Finances in Order?*, Dr. Maddux's work was recently adapted for publication in a widely used family text for college students, *Relationships in Marriage and the Family*, that was published in 1991 by the Macmillan Publishing Company of New York.

Dr. Julia Marlowe, Associate Professor, is a consumer economist who developed a Budget Box System that is designed to help limited-income individuals and families manage their money. The system is now used in over 50 counties in the state. In addition, over 200 agency personnel and volunteers have been trained to use the program. Approximately 2000 families have been involved in the program in Georgia. Thirty-five other states are using the program as well. Dr. Marlowe is an associate editor of *Advancing the Consumer Interest* and reviewer for several other professional journals. A former specialist in the Cooperative Extension Service, Dr. Marlowe is now a faculty member in the college. Dr. Marlowe teaches Family Well-Being and Economic Conditions, as well as Family Resource Management.

Dr. Teresa Mauldin, Associate Professor, a consumer economist, serves on the Southern Regional Research Project, "Determinants and Outcomes of Household Time Use," that is funded by the Agricultural Experiment Station. Her research on the economic consequences of divorce on women and children has improved our understanding of the effect of investment in human capital on women's

abilities to support their families following marital disruption. She is a member of the advisory board of the Governor's Office of Consumer Affairs and is a member of the editorial board of *Lifestyles: Family and Economic Issues*. She recently received the New Leader Award from the College of Human Ecology at The Ohio State University. This award is given for outstanding achievement of college alumni who have received their most recent degree in the past ten years. Dr. Mauldin teaches Individual and Home Management, as well as Consumer and the Market.

Dr. Gladys Shelton, Assistant Professor, specializes in family housing. She is vice president of the American Association of Housing Educators. She has also served in several offices and on committees in the American Home Economics Association, including the Contracts Committee and the Coalition for Black Development in Home Economics. In 1991 she was the recipient of the Outstanding Research Award by Gamma Sigma Delta, Honor Society of Agriculture at North Carolina A&T State University. Earlier she was the recipient of the AHEA Foundation's Flemmie P. Kittrell Fellowship. Among the courses she teaches is Housing Alternatives.

Dr. Roger Swagler, Associate Professor, a consumer economist, is concerned with consumer leverage in the marketplace and has focused on public policy implications, particularly information, product standards, and licensure. Since the establishment of the Housing Research Center in 1988 within the department, Dr. Swagler has become more involved in housing-related research. He has served as an associate editor of *Frontier of Research in the Consumer Interest*, editor of the *Liberian Economic and Management Review*, and currently serves on the editorial board of *The Journal of Consumer Affairs*. His most recent international experience includes serving as a Fulbright Scholar at the National University of Lesotho, 1990-1991. Dr. Swagler teaches Theory in Family Economics and Family Financial Counseling.

Dr. Anne Sweaney, Associate Professor, serves on the Southern Regional Research Project, "Barriers and Incentives of Affordable Housing." She also serves as a team member of the Georgia Centenarian Study, investigating housing alternatives for the elderly and the effect of environmental and social support of the nation's oldest old. Dr. Sweaney was named an Outstanding Home Economist by GHEA in 1987 and was the recipient of the Creswell Award for contributions made to assist students in their professional development. She is active in several professional organizations, including AHEA, the American Association of Housing Educators, the American Council on Consumer Interests, the Gerontological Society of America, and the International Association of Housing Science. Dr. Sweaney coordinates the Legislative Aide program of the College. She teaches Analysis of Family Resource Management, Federal Housing Development, and Housing for the Aged.

DEPARTMENT OF TEXTILES, MERCHANDISING AND INTERIORS

Acting Department Head: Dr. J. Nolan Etters, Professor, is a textile scientist who served in the textile industry for over 20 years as a research chemist, senior research chemist, and corporate senior research scientist before coming to UGA. He has continued his research in textile chemistry concentrating on the physical chemistry of dyeing, statistical and mathematical analysis, and textile chemical quality assurance. His work on developing a better understanding of indigo dyeing, so important to manufacturers of blue jeans, resulted in a first place win in the 1989 Intersectional Technical Paper Competition of the American Association of Textile Chemists and Colorists. Listed in *Leaders in the Textile Industry*, Dr. Etters has served on numerous national committees and has published over 50 manuscripts in nationally recognized professional journals in his field. Dr. Etters teaches Seminar in Textiles, Merchandising and Interiors, Textiles for Consumers and Dyeing Theory.

Dr. Patricia Annis, Assistant Professor, is a textile scientist who is especially interested in the mechanical properties of textiles, especially those that relate to abrasive wear. Her current research includes studies of the development of an abrasion machine to evaluate the wear of textiles materials and the development of instrumentation to investigate carpet wear. In 1990, Dr. Annis and a colleague were given a U.S. Patent for their Material Wear Testing Device and Techniques. Dr. Annis' career as a consultant has led to contributions in many diverse areas, e.g., in 1987, she analyzed textile trace evidence in two criminal investigations in Kansas. She has served on numerous national research committees, including committees of the American Society for Testing and Materials. Dr. Annis teaches Textiles for Consumers, Textile Testing, and Advanced Textiles.

Mr. George Baughman, Adjunct Associate Research Professor and Senior Research Chemist, U.S. EPA Environmental Research Laboratory, is a textile chemist who is interested in the environmental behaviors of dyes on aquatic systems. His research is aimed at predicting how fast dyes break down in the environment and identification of potentially toxic reaction products. Other aspects of the work relate to the solubility of dyes and how dye solubility influences their toxicity and movement within aquatic systems. Mr. Baughman is the U.S. co-chairman of the U.S./Soviet exchange project, "Migration of Pesticides and Chemicals in the Environment," and received the Silver Award from the USA Astronauts. Through the years, he has been the recipient of three Scientific and Technological Achievement Awards for Research at EPA.

Dr. Helen Epps, Associate Professor, is a textile scientist whose research on thermal insulation characteristics of fabrics has provided an understanding of how characteris-

tics of yarn and fabric structure can be utilized in controlling flow of heat and air. Dr. Epps has developed mathematical models which are being used in analyzing heat and air flow through less traditional nonwoven fabrics. Through her research on weathering and lightfastness of textile fabrics, Dr. Epps has studied the effects of heat, light, and moisture in color change of fabrics and has worked on developing techniques that have promise for predicting long-term colorfastness and weather resistance of fabrics. She has served in a variety of roles in many national organizations, including the Association of College Professors of Textiles and Clothing, the American Association of Textile Chemists and Colorists, the American Chemical Society, and the American Society for Testing and Materials. Dr. Epps teaches Textile Testing and a Seminar in Textiles, Merchandising and Interiors.

Ms. Betty Eppers is an Instructor in merchandising whose background in business administration and whose practical experience in business provide a rich dimension to students preparing for careers in the merchandising field. Among the courses Ms. Eppers teaches are Fashion Product Analysis, Clothing and Textile Economics, Apparel Quality Analysis, and Fashion Image Development and Promotion.

Ms. Deborah Gergely is an Instructor in interior design. As a practicing interior designer, Ms. Gergely brings to the department a varied practical background. The courses she teaches include a basic course in which students apply design principles in planning furnishings for the home and utilize the computer for space planning and drawing floor plans. She also teaches the history of architecture, interiors, and furniture to 1850 and courses dealing with techniques of perspective drawing and rendering in various media, fabrics for furnishings and interiors, residential design, and the history of costumes.

Dr. Jan Hathcote, Assistant Professor, specializes in apparel merchandising. She is interested in increasing apparel profitability for American retailers. She has researched the profitability of domestically produced and imported apparel for American retailers and focuses on price sensitivity of apparel from exporting world regions and consumers' shopping and purchasing behaviors. In 1988, Dr. Hathcote was one of five graduate students at The University of Tennessee who received an Outstanding Graduate Student Teaching Award. Dr. Hathcote teaches Principles and Practices in Retailing Apparel and Textiles; Quantitative Analysis in Merchandising Apparel and Textiles; and Seminar in Textiles, Merchandising and Interiors.

Dr. Patricia K. Hunt, Assistant Professor, is a clothing researcher who is in charge of the Historic Costume Collection in the department. As a historian, Dr. Hunt utilizes historic articles of clothing and textiles to examine a unique aspect of history. She concentrates on late 19th and early 20th century dress with particular emphasis on the dress of African American women in Georgia. Among the

courses she teaches are Fashion Product Analysis, History of Costume: Antiquity to 19th Century, and History of Costume from the 19th Century to the Present.

Dr. Karen Leonas, Assistant Professor, is a textile scientist who has evaluated the degradable polymers used in textiles and related products and has examined the degradation rates of plastics enhanced to promote bio- or photo-degradability in a variety of environments including composting operations and aquatic recycling of textile products and textile manufacturing waste. Additional research is focused on the use of textiles as barriers to small particles penetration, e.g., fiber, yarn, fabric construction, and finish influences of preventing the transmission of pesticides and bacteria through fabrics. Dr. Leonas is a member of the S-250 Agriculture Experiment Station Project, "Assessment of the Environmental Compatibility of Textiles and Other Polymeric Materials." She teaches Textiles for Consumers, Textile Testing, and Clothing and Textile Economics.

Dr. Bridget May, Assistant Professor, specializes in design; her work is focused on American Colonial Revival interiors of the early twentieth century. Since its inception, the Colonial style has been one of the most popular styles in American interior design. The need for information to aid restorers in making appropriate design choices guides Dr. May's work. Among the courses she teaches are Decorative Accessories for the Home and Historical Homes and Furnishings. Dr. May attended a Summer Institute at the Winterthur Museum, Wilmington, Delaware in 1983; and later, in 1990, received a fellowship to return to the museum to study for two months.

Dr. Theresa Perenich, Professor, is a textile scientist whose work in the area of pesticides penetration and discoloration/degradation of fabrics has been of interest to the textile industry, especially in the carpeting area. Her pesticide research has led to receiving grants and consultant projects with carpet, chemical and pesticide manufacturers. Dr. Perenich is participating in a five-year regional project on reducing pesticide exposure through improved clothing design and care and investigating the effects of low temperature laundering on bacteria/microorganism removal on fabrics. Dr. Perenich received several UGA teaching grants to internationalize several courses in the department and teaches Research Methods and Environmental Aspects of Textiles, as well as supervises internships for majors in the department.

Dr. Charles Q. Yang is a textile scientist whose research is focused on the applications of photoacoustic infrared spectroscopy to the near-surface analysis of various fibers, yarns, fabrics, and other polymeric materials. His work has provided a unique analytical method for textile research and quality control in the textile industry that has attracted considerable interest. He is also working on a new finishing agent for wrinkle-free cotton fabrics. Dr. Yang teaches textile science courses in the department.

Alumni Awards

The following awards will be presented at the Annual Meeting, May 13. If you wish to make nominations for any of these awards for 1993, please submit a letter of nomination by December 1, 1992 to Awards Committee Chairman, 288 Georgia Center for Continuing Education, The University of Georgia, Athens, GA 30602-3603. Please include in your letter of nomination the following information: name of nominee, title, award for which nominated, current or last employer, address, principal professional accomplishments, awards and honors, community activities or other information relevant to your nomination.

Home Economics Appreciation Award recognizes individuals other than faculty or alumni who have made significant contributions to our college.

Creswell Award honors a faculty member who has provided leadership in motivating and guiding students at The University of Georgia.

Distinguished Alumni Award honors an alumnus who has made significant contributions that sustain the beliefs and values of the professions of the college.

Pacesetter Award honors an alumnus who has received a degree from the college within the last 10 years and has made outstanding contributions to his/her profession.

Nominations for the **Honor Hall of Recognition** are due August 1, 1992. Honor Hall of Recognition is a posthumous award presented to recognize individuals who were outstanding contributors to home economics and would have been eligible for the Creswell or Distinguished Alumni Awards. This award will be presented on October 24.

Gloria Berry, president of the Alumni Association, presented the 1991 Home Economics Appreciation Award to J. Phil Campbell in recognition of his contributions to the college. Mr. Campbell and his wife Nan, shown receiving the award with him, recently became sponsors for the Legislative Congressional Aide Program.

Jennie Beall Pullen, retired Extension District Agent for Home Economics was the recipient of the 1991 Distinguished Alumni Award. Jennie made significant contributions to sustain the beliefs and values of home economics as she worked with adults and young people. Jean Bauerband, Awards Committee Chair, presented the award.

Montine Jackson, a home economics teacher at Moultrie High School from 1939 to 1974, was the 1991 designee to the Honor Hall of Recognition. Individuals participating in the special presentation are, from left to right: Dr. Sharon Y. Nickols, Gerry Jackson of Macon, sister of Ms. Jackson, Joan Gay, member of the awards committee and Gloria Berry, president of the alumni association.

College of Family and Consumer Sciences Announces London Study

Beginning fall quarter, 1992 students in the College of Family and Consumer Sciences will have an opportunity to study abroad in London, England. In addition to earning 15 hours of academic credit from The University of Georgia,

students will experience first hand international life in a culturally-rich environment.

Dr. Anne Sweaney, Associate Professor of Housing and Consumer Economics, will direct a group of University of Georgia students in a unique study program in London through collaboration with the American Institute of Foreign Study (AIFS). This is the first time The University of Georgia has been a part of a collaborative effort with the AIFS. All students will take a course, British Life and Culture, taught by faculty of AIFS. Additionally, they may enroll in a five hour course, Study Tour in Housing and Consumer Economics, which will focus on housing in London. Other options include a Directed Individual Study or an internship related to the student's program of study.

While studying in Bloomsbury, students will have membership in the University of London's student union and library, a weekly program of subsidized cultural and social activities, a local travel pass, and field trips.

Classes will be taught in Bloomsbury, located near the University of London. This 9-week educational adventure is scheduled for September 3 - November 5, 1992. Students from other colleges can participate in the program and earn UGA credit which is transferable to other institutions. For additional information, contact Dr. Sweaney at (404) 542-4877. (NOTE: Area code will change to 706 on May 3.)

What's New with You?

Have you won an award, made a career change, completed a degree, or been involved in other activities that you would like to share with your colleagues? Please send any information by June 15 for the next issue of *Highlights*.

1992 Annual Meeting, May 13

The 1992 Annual Meeting of the Alumni Association will be held in conjunction with the Honor's Day Luncheon for students at the Georgia Center for Continuing Education on The University of Georgia campus. This will provide an excellent time for you to meet our current students, their parents, and faculty. You will also have an opportunity to visit with colleagues and meet the recipients of the alumni awards. An afternoon session will focus on the Legislative Congressional Aide Program with past aides, current aides, and legislators sharing the benefits of the program. Don't miss this opportunity to learn more about your College and its innovative programs.

SCHEDULE OF EVENTS

- 11:00 - 12:00 Registration — Georgia Center for Continuing Education
- 11:00 - 11:45 Business Meeting
- 12:00 - 2:00 Awards Luncheon
Recognition of Honor Students, Scholarship Recipients, College Ambassadors, Legislative/Congressional Aides, Outstanding Teacher
Alumni Award Recipients: Distinguished Alumni, Home Economics Appreciation, Pacesetter, and Creswell Award
- 2:15 - 3:30 The Legislative Process in Action — Highlights on the Legislative/Congressional Aide Program

Please return the registration form and your check for \$15.00, payable to The University of Georgia, by May 6. For additional information, call Wanda Grogan at (404) 542-5654. (NOTE: Area code will change to 706 on May 3.) Parking is available in The University of Georgia parking deck adjacent to the Georgia Center on Lumpkin Street.
